1. Generating New Blog

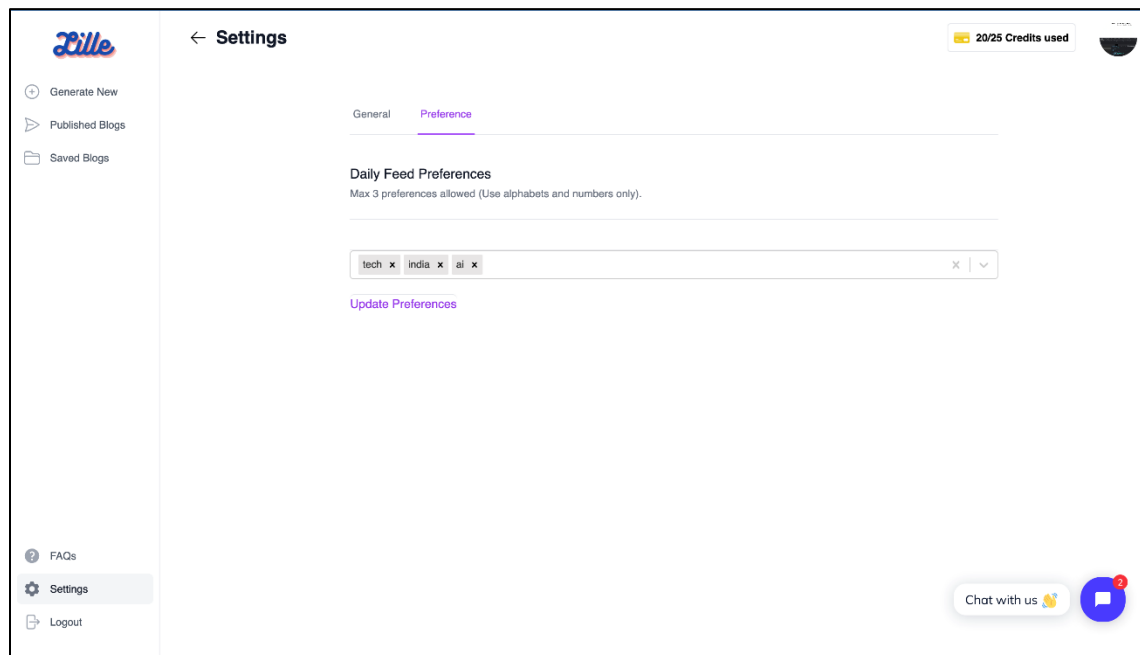

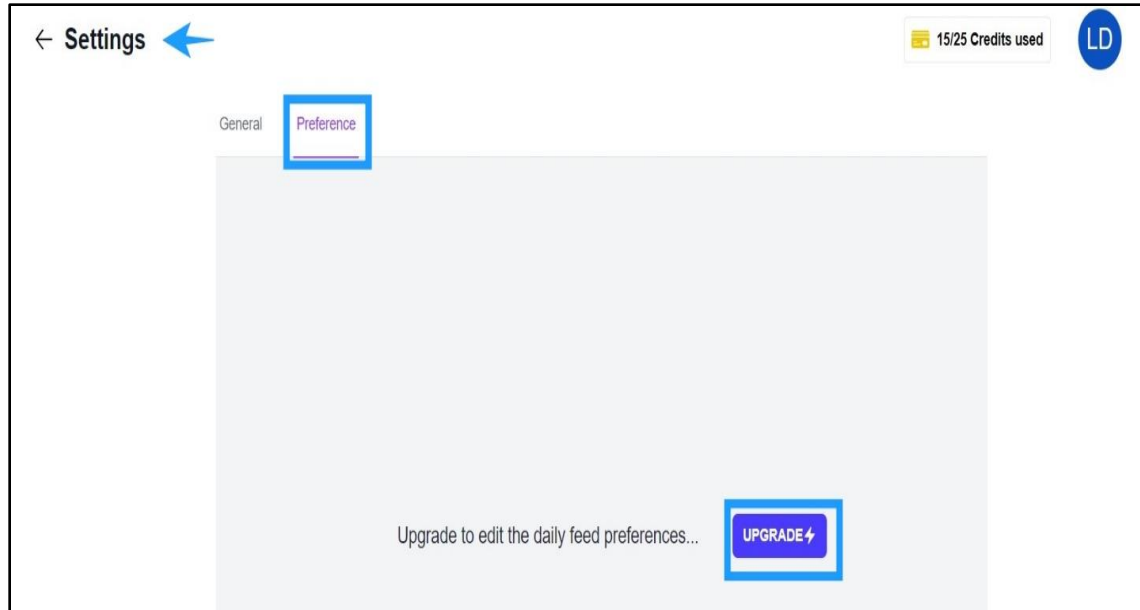

1.1 Blog Generation for Free Users

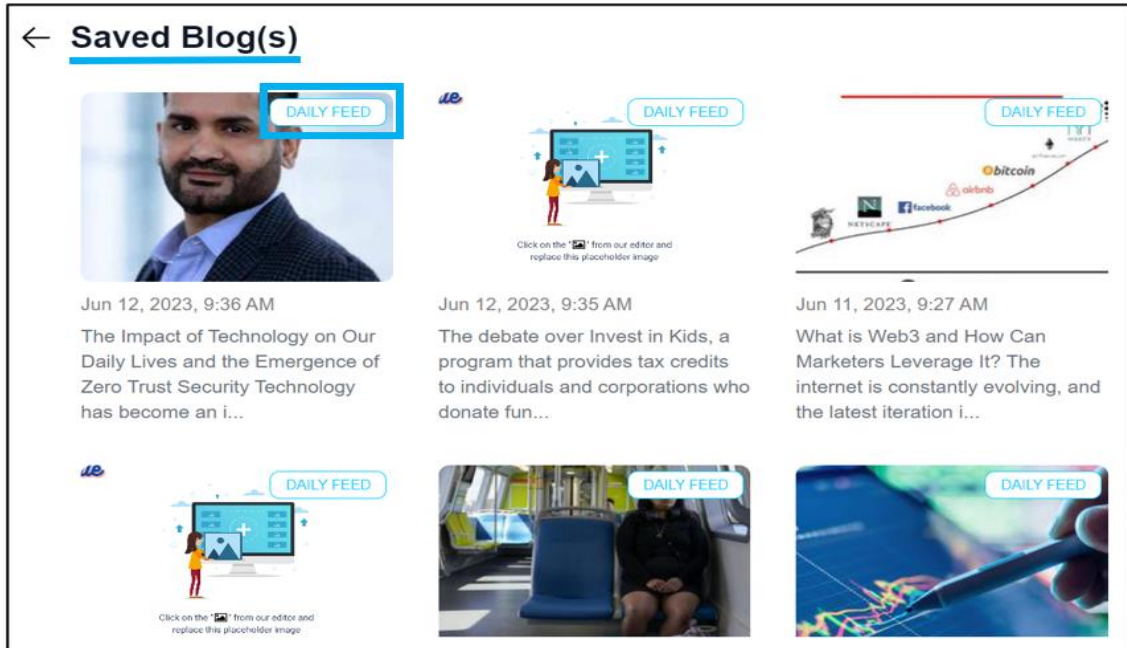

How to generate a new blog? Free users can click on any of the “Trending Topics”, or they can input their own keywords in the search bar and click on the generate button.

1.2 Blog Generation for Paid Users

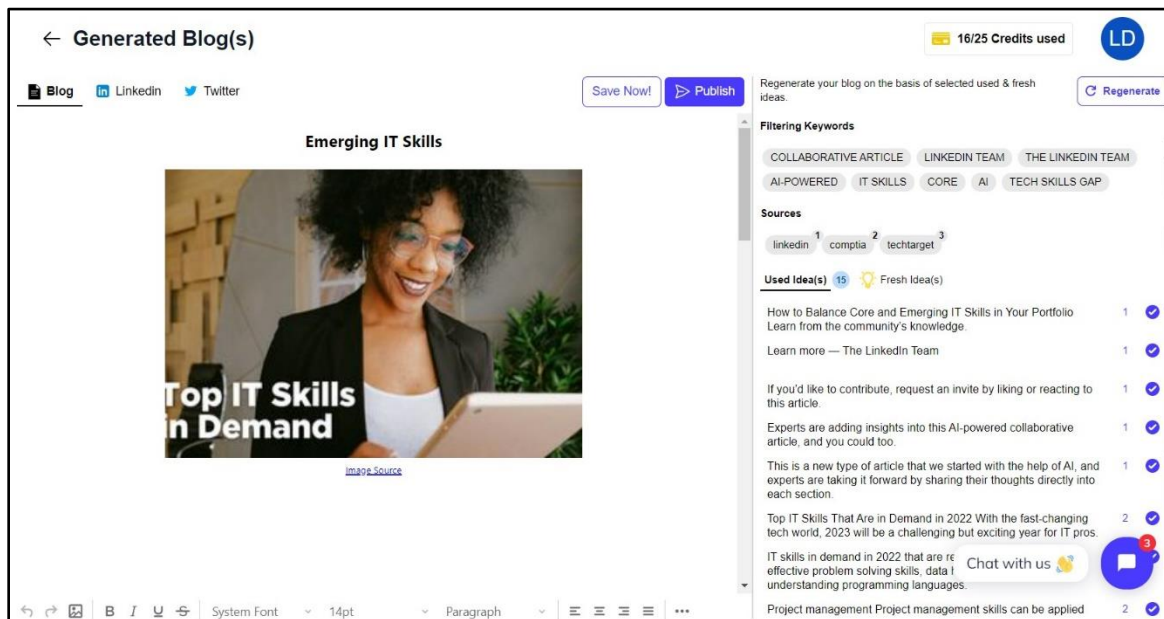

How paid users can generate a blog? Apart from generating a blog as described above, paid users will have additional options to edit their daily “preference” feed in the settings page. Once edited, new blog posts will get generated automatically and appear as ‘Daily Feed’ under ‘Saved Blogs’.

1.3 Generated Blog

What happens after blog generation? Once a blog is generated, users will be taken to the blog post, where users would have various options to edit or change the blog.

1.4 Sources

Will the sources be there in the blog? The generated blog will come added with all the sources from which the blog contents have been taken, including the image sources as well.

Introduction

In the ever-evolving world of technology, it is essential for IT professionals to stay up to date with the latest trends and skills [1]. As technology advances, so do the skills required to stay competitive in the job market [1]. With the right combination of core and emerging IT skills, IT professionals can stay ahead of the curve and ensure their portfolios remain relevant and competitive [1].

Core IT Skills

Core IT skills are the foundation of any IT professional's portfolio. These skills are the building blocks of any IT career and are essential for success [2]. Core IT skills include understanding programming languages, data handling, problem solving, and security [1].

CompTIA Security+ is a great way to gain the baseline skills necessary to perform core security functions [1]. This certification covers topics such as secure server design, application security, and software development [1].

CompTIA Data+ is another great certification to have in your portfolio [1]. This certification covers data concepts, data mining, data analysis, visualization, and data governance [1]. With this certification, you will be able to develop and promote data-driven business decision making [1].

Project management is another essential core IT skill. Project management skills can be applied across the board and make you better at your job regardless of the size of projects you're managing [1].

1.6 Used Ideas

What are used ideas and how to use them? Used ideas are the ideas through which the formation of the blog took place. If we see the right-hand side window of generated blogs page, the user will see that all the used ideas are ticked automatically. If the user desires, they can uncheck a few of the ideas that they do not like to be included in the blog, and then click on regenerate button, to regenerate the blog, and the blog would be generated without the unchecked used ideas.

and create content, prompting skilled employees to leave -- further exacerbating the IT skills gap problem [1].

To close the IT skills gap, organizations should focus on providing IT professionals with the training and education they need to stay competitive [1]. Organizations should also focus on creating career paths and job security for IT professionals [1]. Finally, organizations should focus on creating a culture of collaboration and knowledge sharing to ensure that IT professionals are up-to-date on the latest technologies [1].

Conclusion

In order to stay competitive in the ever-evolving world of technology, IT professionals must have a portfolio of both core and emerging IT skills [1]. In 2022, the most in-demand IT skills will be related to big data, project management, and cloud computing [2]. The IT skills gap has become more acute and problematic for the average IT business, and organizations should focus on providing IT professionals with the training and education they need to stay competitive [1]. By providing IT professionals with the right training and creating a culture of collaboration and knowledge sharing, organizations can close the IT skills gap and ensure that IT professionals are up-to-date on the latest technologies [1].

#EmergingITSkills

As technology continues to evolve, so do the skills needed to stay ahead of the curve. With the rapid advancement of technology, it is essential for IT professionals to stay up-to-date on the latest trends and skills.

The demand for IT professionals with the right skills is growing, and the need for emerging IT skills is becoming increasingly important. From cloud computing to artificial intelligence, there are a variety of new skills that IT professionals need to stay competitive in the job market.

Cloud Computing: Cloud computing is becoming increasingly popular, and it is essential for IT professionals to have a good understanding of cloud computing. Cloud computing allows businesses to store and access data from anywhere in the world, and it is becoming an essential skill for IT professionals.

Artificial Intelligence: Artificial intelligence (AI) is becoming more and more prevalent in the workplace. AI is used to automate tasks, and it is becoming increasingly important for IT professionals to understand how to use AI to their advantage.

Data Science: Data science is the process of collecting, analyzing, and interpreting data. It is becoming increasingly important for IT professionals to understand how to use data to make decisions and solve problems.

Cybersecurity: Cybersecurity is becoming increasingly important as businesses become more reliant on technology. IT professionals need to understand how to protect data and systems from cyber threats.

Blockchain: Blockchain is a distributed ledger technology that is used to store and secure data. It is becoming

3.2 Published Blogs

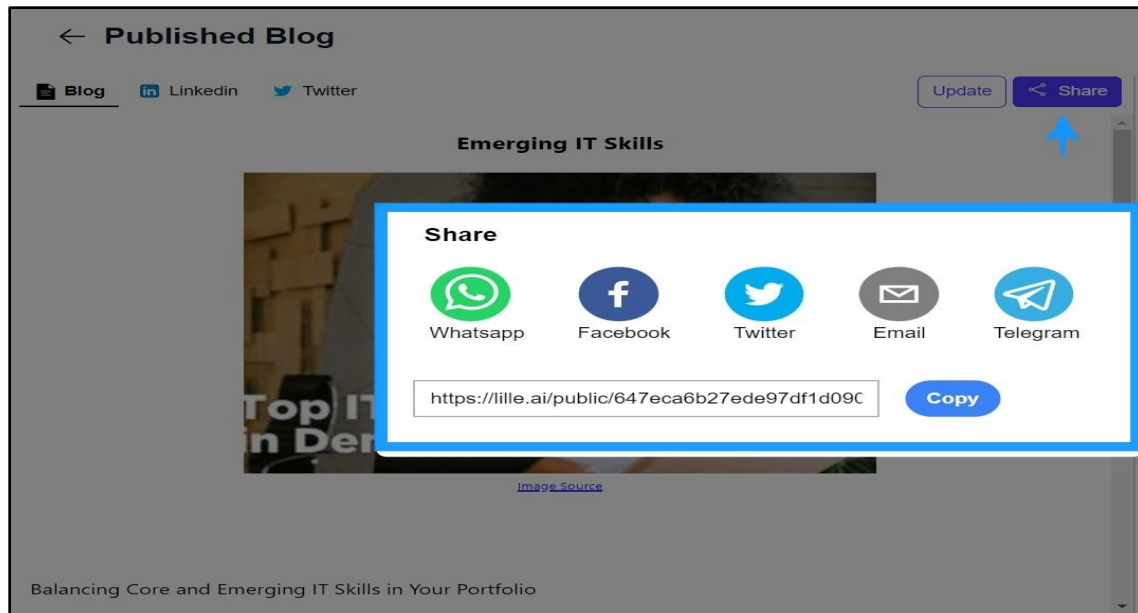

Where are my Published blogs? Once the blogs have been published, they will be available under “Published Blogs” section. Once the users hover their mouse over the blogs, they will also get the option to delete the blog.

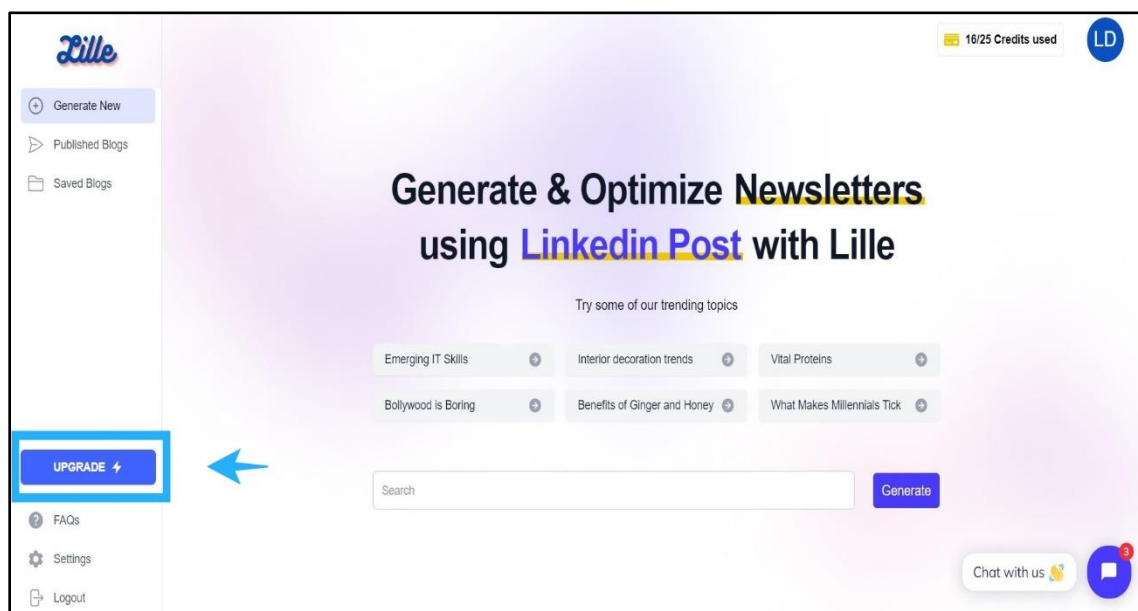

Once the user clicks on the published blog, they will be taken inside the published blog, from where they can edit the published blog, after which they can click on “Update” button, and/or “Share” button to reshare the blog again. They can do the same for LinkedIn and Twitter.

4. Upgrading Lille

How to upgrade? Free users can anytime upgrade their Lille experience from inside the platform. You would have to click on the “UPGRADE” button, which will redirect to upgrade page. Paid users can enjoy full feature access with 200 credits of monthly validity (without rollover of remaining credits to next month), users will get unlimited saving and publishing of their blogs / LinkedIn posts, and users can post 6 tweets per day on Twitter apart from customization possibilities which is not available to free users.

Once on the Upgrade page, users will get monthly, quarterly, or yearly upgrade option.

The screenshot shows the 'UPGRADE' page of the Nowigence application. On the left is a sidebar with the 'Lille' logo and navigation links: 'Generate New', 'Published Blogs', 'Saved Blogs', 'FAQs', 'Settings', and 'Logout'. A blue 'UPGRADE' button with a lightning bolt icon is also in the sidebar. The main content area has a back arrow, a credit usage indicator '0/25 Credits used', and a user profile icon. The 'UPGRADE' section features three tabs: 'Monthly' (selected), 'Quarterly', and 'Yearly'. The 'Monthly' tab displays a dark blue card with the price '\$15.95' and details about 200 credits, unlimited publishing, and topic regeneration. To the right, a 'Join us today' heading is followed by a 'Card Number' input field with a placeholder 'Card number' and a 'MM / YY CVC' label. Below this is a large blue 'Subscribe' button. A disclaimer about data usage is provided. At the bottom right, there is a 'Chat with us' button and a chat icon with a red notification bubble.
